**Faculdade de Ciências do Desporto e Educação Física**

## **MUSCLE POWER IN YOUNG PEOPLE**

Dissertation submitted to obtain the degree of Doctor of Science in Sport and Physical Education Section of Sciences, Physical Activity group of Biokinetics.

**Supported By: FCT** Fundação para a Ciência e a Tecnologia  
MINISTÉRIO DA CIÊNCIA, TECNOLOGIA E ENSINO SUPERIOR

**Supervisors: Professor Neil Armstrong**  
**Professor Carlos Alberto Fontes Ribeiro**

**November 2009**  
**Amândio Manuel Cupido dos Santos**

## List of contents

Abstract .....	4
Resumo .....	6
List of figures.....	12
List of tables .....	14
List of abbreviations .....	15
<b>Chapter one</b>	
<b>Introduction to the problem</b> .....	<b>17</b>
1.1. Brief rationale.....	18
1.2. Statement of the problem.....	20
1.3. Purpose of the study.....	26
1.4. Objectives of the study .....	26
<b>Chapter two</b>	
<b>Literature review</b> .....	<b>27</b>
2.1. Ethical aspects of research with children .....	28
2.2. Interpreting exercise performance data in relation to body size .....	33
2.2.1 Ratio scaling.....	35
2.2.2 Linear regression scaling .....	37
2.2.3 Allometric (log-linear) scaling .....	38
2.2.4 Scaling for body size difference in longitudinal data sets .....	39
2.2.4.1 Ontogenetic allometry .....	39
2.2.4.2 Multilevel modelling .....	40
2.3. Changes in body composition during childhood and adolescence .....	41
2.3.1 Assessing body composition .....	41
2.3.1.1 Criterion laboratory methods .....	42
a) Body density by underwater weighing .....	43
b) Total body water – hydrometry .....	46
c) Measuring body potassium .....	47
2.3.1.2. Other laboratory techniques .....	48
a) Ultrasound .....	48
b) Computerized tomography.....	48
c) Dual energy x-ray absorptiometry.....	48
d) Magnetic resonance imaging .....	49
e) Air pletysmography .....	49

2.3.1.3. Field measures of body composition .....	50
a) Measurement of skinfold thicknesses .....	50
b) Body mass index .....	52
c) Bioelectric impedance analysis.....	53
2.4. Biological development related with anaerobic performance and strength	54
2.4.1. Growth, maturation and development .....	54
2.4.1.1. Body dimensions .....	56
2.4.1.2. Morphological maturation .....	58
a) Stature .....	58
b) Body mass.....	61
2.4.1.3. Controlling for biological maturity .....	63
2.4.1.3.1 Secondary sex characteristics .....	64
2.5. Muscle strength .....	67
2.5.1. Definition of muscle strength .....	67
2.5.2. Development of muscle strength .....	71
2.5.3. Determining muscle size .....	74
2.5.3.1. Measurements techniques .....	74
a) Dissection method .....	74
b) Creatine measurement .....	75
c) Potassium estimation .....	76
d) Estimating regional muscle mass .....	76
e) Anthropometric techniques .....	77
f) Radiography x-ray .....	78
g) Computerized tomography .....	78
h) Ultrasonography .....	78
i) Magnetic resonance imaging.....	79
2.5.4. Energy systems .....	81
2.5.4.1. Energy .....	81
2.5.4.2. Energy sources .....	81
a) Carbohydrate.....	82
b) Fat.....	82
c) Protein.....	83
2.5.4.3. Rate of energy release.....	83
2.5.4.4. Metabolic activity during exercise .....	84
2.5.4.5. Anaerobic performance in children .....	86
a) ATP-Cr system .....	86
b) Glycolytic systems .....	88

c) Oxidative system.....	91
2.5.4.6.Exercise metabolism .....	93
a) Maximal (or peak) anaerobic and aerobic performance .....	93
b) Muscle biopsy studies .....	95
c) Muscle fibre types .....	96
d) Muscle metabolism .....	98
e) Lactate production and concentration .....	99
f) Enzyme activity .....	101
g) Substrate utilization .....	105
h) Hormonal responses .....	109
i) <sup>31</sup> Pmagnetic resonance spectroscopy .....	109
j) Oxygen uptake kinetics.....	113
2.5.5. Test protocols for the measurement of anaerobic performance .....	116
a) Vertical jump test .....	118
b) Isokinetic monoarticular anaerobic test .....	120
c) Maximal accumulated oxygen deficit .....	121
d) Running tests .....	121
i. Margaria step test .....	122
ii. Motorized treadmill running .....	123
iii. Non motorize treadmill .....	124
e) Cycling tests .....	125
i. The Wingate anerobic test (WAnT).....	125
ii. Force velocity test (FVT) .....	130
<b>Chapter three</b> <b>Cross-sectional studies.</b>	132
<b>Age and sex-related changes in optimal peak power</b>	
3.1. Introduction .....	133
3.2. Subjects .....	135
3.3. Material and Methods .....	135
3.4. Data analyses.....	136
3.5. Results .....	137
3.6. Discussion .....	141
3.7. Conclusions .....	148
<b>Chapter four</b> <b>Longitudinal study.</b>	
<b>Optimal peak power in relation to age, body size, gender and thigh muscle volume</b>	149
4.1. Introduction .....	150

4.2. Materials and Methods .....	152
4.3. Participants .....	152
4.4. Measurements .....	153
4.5. Statistical Methods .....	155
4.6. Results .....	157
4.7. Discussion and conclusions.....	160
<b>Chapter five</b>	
<b>Final discussion, conclusions and recommendations</b> .....	<b>166</b>
5.1. Chapter one.....	167
5.2. Chapter two .....	168
5.3. Chapter three .....	177
5.4. Chapter four.....	184
5.5. Conclusions .....	190
5.6. Recommendations .....	191
<b>Appendix A - Form of Consent</b> .....	<b>193</b>
<b>Appendix B - FVT-WAnT-Isokinetics Longitudinal Study</b> .....	<b>195</b>
<b>Appendix C – Questionnaire</b> .....	<b>196</b>
<b>Appendix D - FVT-WAnT-Isokinetics Longitudinal Study – 1<sup>o</sup> Test</b> .....	<b>197</b>
<b>References</b> .....	<b>198</b>
